Supervisory Patent Examiner, Art Unit 2111

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Prior art of record fails to teach *"evaluating each entry with respect to a cache to determine whether a hit, miss, or victim cached state is applied to each entry; storing an appropriate cache state in each entry; and servicing a particular entry in the particular one of the plurality of groups based on servicing criteria and its associated cache state"* in the combination as disclosed and claimed.

The Examiner interpreted the claims in light of the Specification and further in view of Applicant's persuasive arguments that *"neither the Bauman, et al. patent or the Trull patent evaluate each entry with respect to a cached, store a cache state in the entry, and service entries using the cache state as provided in the claimed invention"* (pages 9-10 of the Remarks).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, as the art discloses state information associated with requests:

U.S. Patent 6,499,077 Abramson et al.

U.S. Patent 6,449,671 Patkar et al.

U.S. Patent 5,432,918 Stamm
